Antimalarial treatment policy

	Date adopted:	
Uncomplicated	Probable	CQ 25 mg/kg
	Confirmed	CQ 25 mg/kg
Treatment failure		SP
Severe malaria		Quinine 3 times a day, 7 days
Pregnancy	Prevention	CQ weekly

Taxes and tariffs on insecticide-treated nets

	Date
Import tariff - nets	
VAT - nets	

Notes

For an explanation of indicators, ranks, and other information, see the Country Profile Overview.

Sources listed reflect most recent value.

Case notification rate is based on number of reported outpatient cases.

Nationally representative surveys (MICS and DHS) are used for reporting intervention coverage estimates for 1) mosquito net and ITN possession and use and 2) antimalarial treatment.

¹ Population at risk is determined from modelling retrospective climate data and population projections. Percentage of population at risk does not vary by year.
