Malaria morbidity and mortality

- Hospital deaths due to malaria
- Malaria admissions
- Malaria outpatient attendance

Malaria in pregnancy

- PW receiving ANC at least once
- PW attending ANC at least twice
- PW receiving IPT at least once
- PW receiving IPT at least twice
- PW using mosquito nets
- PW using ITNs

Mosquito nets and ITNs

- Households with mosquito nets
- Under-5s using mosquito nets
- Households with ITNs
- Under-5s using ITNs

Antimalarial treatment

- Under-5s receiving any antimalarial
- Under-5s receiving chloroquine
- Under-5s receiving any antimalarial <24 h

Attending health facility

- Under-5s receiving any antimalarial
- Under-5s receiving chloroquine

Note:
- For an explanation of indicators, ranks, and other information, see the Country Profile Overview.
- Sources listed reflect most recent value.
- Case notification rate is based on number of reported outpatient cases.
- Nationally representative surveys (MICS and DHS) are used for reporting intervention coverage estimates for 1) mosquito net and ITN possession and use and 2) antimalarial treatment.

1 Population at risk is determined from modelling retrospective climate data and population projections. Percentage of population at risk does not vary by year.
