Intermittent preventive treatment against malaria in pregnancy (IPTp) saves lives. In 2013, an estimated 15 million of the 35 million pregnant women who should have received IPTp did not. Now is the time to act. Visit the Roll Back Malaria website to learn more about the global call to action.

In Africa, malaria infection during pregnancy is responsible for an estimated 10,000 maternal and 75,000 – 200,000 infants deaths. Join the global call to action. Visit the Roll Back Malaria website to learn more.
