

Cambodia: Net and ITN Coverage

	Nets	ITNs
% HH owning ≥ 1	96 %	25 %
% people sleep under	84 %	20 %
% U5 sleep under	87 %	20 %
% PW sleep under	86 %	13 %
% HH with "sufficient" (2.3)	37 %	7 %

Cambodia: Net usage vs person: net ratio

		Numbers of households in clusters with cluster-level ratios of		
		Cluster ratio > 2.3 (63 clusters)	Cluster ratio < 2.3 (27 clusters)	All 90 clusters
Number (%) of Households with a household-level ratio of	HH ratio > 2.3	1703 69.9%	406 43.8%	2109 62.7%
	HH ratio < 2.3	733 30.1%	521 56.2%	1254 37.3%
	Total HH	2436 (73%) 100.0%	927 (27%) 100.0%	3363 100.0%

Net and ITN Coverage

	<5	5-14	15+ M	15+ F	Preg F
Never treated net *	48 %	47 %	46 %	49 %	55 %
Expired ITN*	19 %	17 %	16 %	16 %	18%
Fresh ITN	20 %	21 %	18 %	19 %	13 %
No net **	13 %	15 %	20 %	16 %	14 %

* These people are potential converts to ITN-use through re-treatment campaigns

** These people are potential converts to ITN-use through free ITN distribution

Are ITNs being wrongly reported as untreated nets?

Source of Net	Has the net ever been soaked with insecticide?	
	Yes	No
Commercial / Market / Shop N = 2026	18 %	82 %
Government / NGO / Project N = 686	80 %	19 %

Conclusion: both questions are being answered fairly accurately
