To provide a coordinated global approach to fighting malaria, the Roll Back Malaria (RBM) Partnership was launched in 1998 by WHO, UNICEF, UNDP and the World Bank. Today, the global RBM Partnership includes a broad, diverse range of partners - including malaria-endemic countries, their bilateral and multilateral development partners, the private sector, nongovernmental and community-based organizations, foundations, and research and academic institutions - who bring a formidable assembly of expertise, infrastructure and funds into the fight against the disease.

## ExxonMobil

**Dr. Steven Phillips**  
Medical Director for Global  
Issues and Projects  
Phone: +1 703 846 7407  
[Steven.c.phillips@exxonmobil.com](mailto:Steven.c.phillips@exxonmobil.com)

ExxonMobil is proud to be a lead sponsor of the Zambezi Expedition, which we hope will help galvanize international support in the fight against malaria. We value the partnership of African governments and the emphasis on delivering life-saving treatments to people in need. ExxonMobil established its Africa Health Initiative in 2000 in support of the Abuja Declaration on Roll Back Malaria in Africa, which has a goal to halve malaria deaths by 2010. Since then, we have invested about \$40 million to fight malaria at the community level, on treatment and vaccine research and on raising awareness and international support.

Malaria No More's mission is simple: to end deaths due to malaria. Malaria No More works to raise the profile of the disease among the public, policymakers, and businesses, while engaging the private sector to provide life-saving mosquito nets and other critical interventions to families in Africa. Together, we can make malaria no more.

Medicines for Malaria Venture (MMV) is a non-profit organization dedicated discovering, developing and delivering safe, effective, and affordable antimalarial drugs through public-private partnerships. Working with over 80 partners worldwide, MMV is managing the largest-ever portfolio of malaria drug research with over 40 projects in different stages of drug R&D. The first new drug could be ready for market in 2008. MMV's goal is to make a public health impact and meet the needs of the 3.2 billion people at risk from this deadly disease.

NetsforLifeSM works with churches in Africa to mobilize grassroots communities to prevent and treat malaria. We will distribute five million nets and provide malaria education and evaluation in 18 countries by 2012. Our partners are Standard Chartered Bank, The Starr Foundation, ExxonMobil Foundation, The Coca-Cola Africa Foundation, White Flowers Foundation, and Episcopal Relief and Development. We joined the Zambezi Expedition to raise malaria awareness and combat malaria in vulnerable populations.

Novartis is a world leader in offering medicines to protect health, cure diseases and improve well-being. Cumulatively, Novartis has provided without profit, over 140 million Coartem® treatments to malaria patients worldwide, since 2001, thus contributing to saving thousands of lives. 75% of these 140 million Coartem® treatments were for babies and young infants. Novartis is sponsoring the Zambezi Expedition in order to show its strong commitment to tackling the disease and creating a malaria-free future for children.

The United Nations Foundation champions the United Nations and is a platform that connects people, ideas and capital to help the UN solve global problems. Through our campaigns and partnerships, the UN Foundation makes it easy for individuals, businesses and non-governmental organizations to work with the UN on key global challenges. We are dedicated to fighting malaria through our support of Roll Back Malaria and our Nothing But Nets campaign, a grassroots effort to raise awareness and funds for malaria prevention.
